Tracy Samuelson, Assistant Director of Planning and Zoning  
City of Bethlehem  
10 E. Church Street  
Bethlehem, PA 18018

April 25, 2022

Dear Ms. Heller and Ms. Samuelson,

We appreciate the opportunity to comment on the proposed development 130 W. Geopp Street. Our recommendations are in support of Bethlehem City's Climate Action Plan (CAP), which aims to reduce our carbon footprint, increase sustainability and utilize alternative energy sources.

New construction projects provide opportunities to employ energy saving strategies that will lower energy costs and at the same time reduce pollution from traditional energy sources. Therefore, we strongly recommend that the developer utilize sustainable building materials and energy efficiency measures beyond the building code, such as passive solar design features, advanced lighting controls, high efficiency HVAC equipment, increased insulation and advanced air sealing techniques to reduce infiltration. A green roof would contribute to lessening the heat island effect, especially as the climate continues to warm. Green roofs also help lower the heat inside the building and aid in stormwater management.

Furthermore, we encourage the developer to evaluate the inclusion of solar panels or at least constructing the building with adequate structural rooftop capacity and electrical rough-ins so that solar could easily be added at a later date.

Whenever possible, existing trees should be preserved or replaced. Landscaping is important and we recommend coordinating with the City Forester in the selection of native species for both street trees along the front of the building as well as trees and landscaping in the back of the building. Increased greenery along the street will also soften the building's impact and make it more inviting.

Another recommendation is the inclusion of "easily-accessible, secure, sheltered bicycle parking" as recommended in the CAP (Transportation Strategies T1.2 and T1.9). Secure indoor and outdoor bike parking facilities for residents and visitors would be ideal, especially since it can be difficult to store a bike in an apartment if there isn't dedicated space.

Thank you for your consideration.

Sincerely,

*Lynn Rothman*
