Darlene L. Heller, Director of Planning and Zoning
Craig Peiffer, Assistant Director of Planning and Zoning
City of Bethlehem
10 E. Church Street
Bethlehem, PA 18018

Dear Ms. Heller and Mr. Peiffer,

We appreciate the opportunity to comment on the proposed reconstruction of the Sheetz building and the addition of a carwash on 3201 Schoenersville Road. Our recommendations are in support of Bethlehem City's Climate Action Plan (CAP), which aims to reduce our carbon footprint, increase sustainability and utilize alternative energy sources.

New construction projects provide opportunities to employ energy saving strategies that will lower energy costs and at the same time reduce pollution from traditional energy sources. Therefore, we strongly recommend that the developer utilize sustainable building materials and energy efficiency measures beyond the building code, such as passive solar design features, advanced lighting controls, high efficiency HVAC equipment, increased insulation and advanced air sealing techniques to reduce infiltration.

Furthermore, we strongly recommend that the developer perform a solar assessment, and if feasible, include a rooftop solar system. At a minimum the building could be constructed with adequate structural rooftop capacity and electrical rough-ins so that solar could easily be added at a later date. Note that there are currently tax incentives for new solar systems. In addition, Northampton County adopted the Commercial Property Assessed Clean Energy (C-PACE) program. C-PACE is an innovative financial tool that allows financing for solar, increased energy efficiency and water conservation projects to be attached to the property instead of the owner. This can free up developers' finances by placing the assessment on the property and structuring repayment through property taxes.

Stormwater control and landscaping will be coordinated with the City Department of Public Works and the City Forester. We recommend consulting with the City Forester in

the selection of native species that will be resilient to climate change for new trees and bushes.

We commend the inclusion of three bicycle parking spaces. The CAP recommends the inclusion of "easily-accessible, secure, sheltered bicycle parking" (Transportation Strategies T1.2 and T1.9). We also strongly encourage the inclusion of Electric Vehicle charging stations.

Thank you for your consideration.

Sincerely,

Lynn Rothman
